

Environmental Landscaper

Type of Appointment: Temporary to permanent

Based at: Standish, Stonehouse, Gloucestershire

Salary: Above the minimum wage

JPR Environmental is looking for new recruits to join our small, friendly team of environmental landscapers. The company is committed to training and development and provides full induction on all machinery, CSCS health and safety training, first aid training, and any other task-specific training as necessary. There are opportunities for individuals to develop a full range of landscaping and construction skills with us.

Previous experience in landscaping and/or construction would be useful but is not essential. It is important that candidates are reliable, keen to work outside, keen to work in a team and are enthusiastic to see jobs through. An interest in the environment, in wildlife and in landscaping would be an advantage.

As a company, we want to develop our staff and we want them to stay with the company for the long-term.

JPR Environmental is an ecological contracting company that has been operating since 2000 and is based in Standish, Gloucestershire, although work regularly involves travel and staying away (all travel expenses are paid by the company). We work on the following types of projects:

- Wildlife mitigation (fencing, habitat creation)
- Wetland creation – ponds and lakes
- Reedbed creation
- Water treatment systems
- Sustainable drainage systems
- Erosion control
- Invasive species control

More information on specific case studies can be found at:
